The onepagem package*

Mike Piff†

28 Mar 1996

If the document has only one page, omit page number. (onepagempty) The page number must be produced by means of `\thepage`. Needs two passes through LaTeX to work, as it writes to the `.aux` file.

The first version was a joke put on CTAN to illustrate how useful `\AtEndDocument` is. This one works...

*This manual corresponds to onepagem.sty v1.01a, dated 28 Mar 1996.
