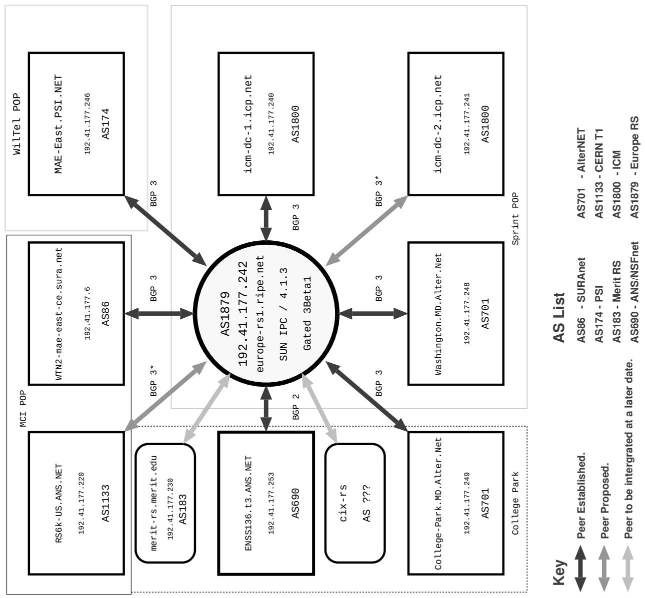
“Route Server Project” Summary

Summary

- ❍ Route Server Project is “officially” over but....
  - ❍ RIPE NCC will continue to operate the RS
- ❍ Route Server **itself** is fully operational
  - ❍ Routing software working well
  - ❍ Policy based derivation working in “kludge” mode **(NEED THE RR POPULATED)**
  - ❍ All working automatically
- ❍ Collaboration with other projects continues

Summary

- ❍ Work on monitoring of European routing
  - ❍ Daily and Weekly reports
  - ❍ Looking at new networks and Routing Domains appearing in Europe
  - ❍ History of routing
- ❍ Consensus on use of the European RS by the proto-GIX partners as soon as is possible.
- ❍ Table of European AS (hence networks) maintained by “kludge” process and used in RS
  - ❍ Plan to use this as basis of routing decisions at the GIX



RIPE ncc

Status

- Full network based policy list used.
  - Translates to some ~7500 policy rules
  - RS currently contains 11500 routes but after policy gives

Class	#	%
A	3	0.1
B	739	21.7
C	2665	78.2
Total	3408	

Number	#	%
Any (192)	1402	52.6
RIPE (193)	1262	47.4

RIPE ncc

Summary

- So it works !!
- Project Report available

ftp.ripe.net:ripe/docs/ripe-docs/ripe-093.ps

- Thanks to SURFnet for funding project
- Provided stimulus for RIPE-81 and PRIDE
